Project Leader
P24–406

Start: Asap
Location: 2 days Brussels; 3 days remote
Duration: 2 years, extension possible

Context

The Information Systems (IS) Non-Life Data team, which is responsible for all Non-Life data analytics and reporting solutions and for some division transversal's projects like GDPR, IFRS Fast Close and contributes also to the AG DWH migration Project is looking for a senior project leader.
The candidate will work within the IT organization on various medium / large projects, with multiple ones in parallel. In his role, he will manage projects, planning, people activities, report to the Business, the IT management, …
Proven experience with project leading management in an IT environment with multiple teams is a must. Insurance and/or data DWH knowledge are not required but would be useful. The candidate will be working in a dynamic and innovative context of data centric and data driven company. He/she will join a strong team where he/she can help shape solutions in an always evolving domain covering the data of all the Non-Life Underwriting and Claims applications.

Responsibilities

- Organize project governance (stakeholders, resources, external dependencies, communication plan…)
- Manage multiple projects in parallel
- Manage and challenge business requirements
- Coordinate architecture activities and outputs
- Set-up project budget and roadmap
- Follow progress of the developments
- Report on progress, timing, scope, quality and budget to the client and the senior managers
- Anticipate risks and issues and propose actions to tackle them
- Communicate pro-actively to all stakeholders of the project
- Stimulate the project teams
