

# SENIOR E2E TEST MANAGER

## P24-477

Start: Asap  
Locatie: 2 dagen onsite in Antwerpen (Berchem), 3 dagen thuiswerk  
Duurtijd: 31/12/2025, verlenging mogelijk  
Bedrijf: Argenta

---

### Context

E2E Test Manager Fenix-programma:

This project will configure a new application (package Fronteo, supplier Mainsys) into Argenta demanding's and integrate with the Argenta-applications. Testing for this project will be managed very strictly: design test strategy, approach, planning and follow-up of the results. This by aligning 3 parties with each other (Argenta business, Argenta IT & the supplier Mainsys);

### Profile

- 8+ years of experience in developing and implementing E2E test strategies and plans for complex projects, including test objectives, test approach, resource allocation, and schedules.
- Good knowledge of test methodologies. Relevant certifications (e.g., ISTQB) are an advantage.
- Experience with test management tools, e.g. JIRA (preferred), HP ALM ...
- Experience in banking and preferably good knowledge of the credits domain in particular.
- Native/full proficiency in Dutch and preferably working proficiency in English and French.
- Knowledge of webservice development, REST APIs and usage of xsd/JSON files.
- Experience with API automation and tools such as selenium, postman, swagger ui.
- Experience in CICD/DevOps tool chain – GIT, Jenkins.
- Experience working in a SAFe/Agile context.
- Experience as E2E Test Manager with knowledge of implementation Mainsys FRONTeO-solution.
- Excellent leadership and communication skills. Able to communicate efficiently with both business and IT teams (design, functional and technical matters).
- Extensive analytical, problem solving, coordination, decision-making and follow-up skills.
- Pro-active, hands-on mindset with strong sense of responsibility and ownership.

## Tasks

- Collaborate with epic owner, business analysts, functional analysts and developers to understand project requirements and define the testing approach.
- Establish and enforce quality assurance processes for the project, in line with relevant company guidelines and in close cooperation with the testing competence center.
- Evaluate the feasibility of test automation and (guide) development of automated test scripts where applicable.
- Create and maintain test documentation, including test plans, test cases, and test reports.
- Review test artifacts to ensure compliance with project requirements and best practices.
- Oversee the execution of test cases, including user acceptance, functional, integration, regression, and performance testing.
- Monitor progress, identify and prioritize issues, and ensure timely resolution of defects.
- Define and track key testing metrics to measure the effectiveness and progress of testing activities.
- Ensure clear and concise communication of test results to project stakeholders. Prepare and present test status and defect reports.
- Identify, assess & report testing risks and develop mitigation strategies.
- Implement process improvements and optimizations in the testing methodology.
