Detailed Job Description

The Leads Team is responsible for the processing of different commercial messages towards our customers via their mobile app, Kate or e-mail. As a Business Analyst you are the bridge between IT & Business. Within our team, you'll be the first point of contact for internal and external colleagues. You help building and extending the existing leads framework. You keep an overview and do the follow-up of your projects.

What we expect:

- Analyzing and translating business requirements to a fitting IT solution.
- You make sure the IT-solution is accepted in the organisation, taking into account the enterprise architecture. To achieve this, you align the different colleagues: technical experts IT architects, colleague business analysts.
- You make a feasibility study: In a Feasibility, you study the work preparation of a project and sketch alternative solution approaches, including assessment of their scope, budget, time-to-market and ability-to-execute
- You help draw the roadmap for future extension of the leads framework, for example the positioning of the different tools, evolution towards real time,... and you translate this roadmap to concrete solutions.
- Cooperating on end-to-end testing in which you take the necessary responsibility
- After completing a project, list the data deliverables and transfer them to the Data Maintenance Team
-
